2007 Driven to Perform

Biperformance made their presence known for its third consecutive appearance at the highly anticipated June 23 Driven to Perform show. Combining the biggest names in entertainment, unbelievable demo vehicles from all over North America, plus magazine cover cars and bikes, this was truly not an event to be missed!

ShiftFX Drag for ZX14

ShiftFX Drag - ZX14 for the performance aftermarket went on sale in April and has already provided impressive returns both on the track and in total sales. Features of the fully engineered bolt-on kit include: high quality CO2 system, custom made shift cylinder assembly, and specialized software

that activates an optional dry nitrous spray at full throttle position. Variable shift times based on gear position have allowed for gear changes in the upper gear range in less than 50 milliseconds!

BMW Concept Bike

When the talented people of Canjamoto and BWM Canada teamed up to create a one of a kind concept bike they knew they needed to do something special. That is when Biperformance got involved. With totally unique carbon body work, custom fabricated exhaust, and the semi-automatic goodness of ShiftFX this amazing concept vehicle is turning heads wherever it goes!
