2007 Race Update

Biperformance is proud to announce that it will be sponsoring three race teams in the 2007 season. ShiffFX will once again return to the drag strip and autocross track and will make its first ever appearance in the Canadian Superbike race circuit. The GSXR750 Adrenaline Racing superbike will be piloted by Mark Carmichael. In 2006 Mark dominated the amateur ranks taking a total of 6 regional championships. Mark joins the pro ranks for the 2007. Competing in the CMDRA National Drag Race circuit, Leigh Gallant, will be running two ShiffFX equipped motorcycles. The Kawasaki ZX10R that championed the King-of-the-Hill event last year will return alongside a brand new ZX14. Continuing its tradition of support for the University of Waterloo's FormulaSAE race team, Biperformance will supply the latest and greatest ShiffFX technology to shave down those laps times and bring our boys into the winners circle. Best of luck to the teams this year!

Vancouver Bike Show

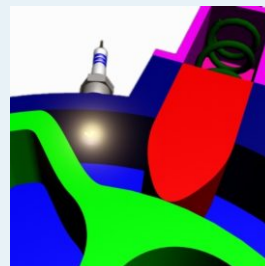

The 2007 Vancouver Motorcycle Show held in January was a great success for Biperformance. As a regular exhibitor, Biperformance uses

the event to showcase its product lines as well as educate the public on its ShiffFX technology. This years attendance is expected to surpass last years event that drew 40,000 motorcycle fans over 4 days.

Web Developments

The Bipertech and Biperformance websites will be receiving a timely update and redesign this spring. Moving away from flash the site will be redesigned using html

for improved navigation and user experience. New technology content will be uploaded to the Under Development section. The feature technology will focus on an exciting new rotary engine concept.
